

# Parts and Other Services

## PARTS

Kennco equipment is designed to provide the longest possible service, but parts eventually wear out and accidents do happen. All of the parts we put into our equipment are available as replacements from our parts and sales departments.

- We carry a variety of different chains and conveyor components.
- We handle special gear boxes.
- We carry a wide variety of parts for hydraulic systems such as hose, fittings, flow control valves, cylinders, and repair kits.
- We can supply structural steel and flat stock cut to fit your needs.
- We carry a variety of drive line components such as PTO shafts, u-joints, and yokes.
- We stock a wide variety of plumbing fittings in PVC, steel, poly, and stainless steel.

In addition to replacement parts for Kennco products, we can supply a wide variety of common parts used in agricultural equipment.

- We are an authorized TeeJet distributor and can supply any item in the TeeJet product line.
- We are a distributor for Comet pumps and stock many Comet repair parts.
- We have access to most sprayer component manufacturers' product lines.
- We can supply Federal Mogul parts such as bearings and seals.
- We stock special tillage tools such as sweeps, disks, blades, and knives.

We make every effort to keep most of these items in stock. If you need an item not currently in our inventory, we can still get it for you quickly and at a competitive price. Contact either our parts department or sales department for your parts needs.

## CUSTOM FABRICATION AND MANUFACTURING, AND EQUIPMENT REFURBISHING

In addition to making a complete agricultural product line, Kennco is also an industrial fabricator and custom manufacturer. We can provide you with a wide variety of custom fabricated and machined parts. Our machine shop includes several pieces of CNC equipment to make your precision parts. We have certified welders with many years of fabrication experience. We have sheet metal and steel plate cutting equipment.

We also refurbish equipment for our customers. If you have an old piece of equipment, whether a Kennco product or not, we can refurbish it so that it works like new.

Our certified welders are experienced in carbon, stainless steel, and aluminum welding.

Our machine shop is equipped with the latest technology and precision CNC equipment.

Our welders are accustomed to a wide range of projects.

Big projects are no problem in our 15,000 square foot assembly building.
